

the experiment of casting frozen cider, vagaries of the clock-case existed only in the imagination.

the interdict being taken off, Joe was to resume his courting, and won the consent of the old people to his union with Sally, by the old clock till it went as well as ever.

weather for the last two days has experienced a change. The high winds prevalent during the summer season seem to have spent and blown their blast. Yesterday was a day of the year, judging from the oppressive heat during a portion of the day. At night the sky has been brilliant and exhibiting almost unmistakable symptoms of a fall. We would not be at all surprised, if the weather should partially set in about the time of the 20th inst., as is the case in California. This tendency to a change in the weather has been gradually but surely revealing itself in California, in proportion to the increase of civilization and morality. Heaven had not waste its blessings on a place that could not appreciate them.—*S. F. Sun.*

FOR INDIANS!—Mr. Lyons, of Willow Springs, on the Cherokee road, four miles east of Placerville, showed us last Tuesday an arrow, which had been shot into an ox on his ranch, and which had wounded it. Two Indians were seen near the tracks of two horses, and the tracks of men, some barefoot and some with moccasins, were also seen. It is only a short time since that a man was shot at through the window of his house. Remember this was only in Sonora—the same place where Mr.

Comodore to build him three or four steamers; but he has respectfully declined every temptation of the sort, averring that he is merely on a pleasure trip, with his family, and is not by any means looking up a job from any one. There is a real dignity in this conduct of the Commodore, comporting well with his character as one of the American sovereigns on a visit of pleasure to some of his regal cousins.—*Staten Islander, July 23d.*

QUICKEST TIME ON RECORD.—Charles Shed, a driver of Stevens & Co.'s Express line of Sacramento and Placerville stages, on Thursday last, with nine passengers, made the trip between the two places, including all delays, stops and detentions, in five hours and ten minutes. Hunter & Co. are the agents at this place.

FASHION AT WATERING PLACES.—A correspondent, in speaking of the ladies at Saratoga, says they "wear their shoulders bare to the lower edge of decorum."

Eagle Hotel and Restaurant.

THIS well known establishment, situated on Main street, in the immediate vicinity of the express and stage offices, having been completely remodeled and refitted with new furniture, and its large and airy pleasure rooms put in the best possible condition for the convenience and comfort of occupants, is now opened as a hotel and restaurant, where the patrons of the establishment can, at all hours, obtain the choicest viands and liquors that the markets afford. And the proprietress assures her patrons, that no effort of hers shall be wanting, to secure the share of public patronage she desires.
